^^

Ah, purity! Never use keyers myself; they really "bug" me. As every
Scouter knows, KISMIF.

|>It just seems more to the point. Don't ya think?

I would actually distinguish between the two types of call.

If I heard someone say "blah blah blah monitoring", I would probably not go back to them unless I knew them, and wanted to talk to them about something specific. (I think of this as an indication of their presence on the frequency rather than an open invitation to chat --- an action that strictly speaking is not permitted according to the UK license.)

A general CQ I interpret as an invitation for anyone to respond, so I might.

Does anyone agree with that?

David (GM0SYA)

The ARRL runs regular code practice on W1AW, and I have heard some local repeaters run practice sessions as well. W1AW skeds are published periodically (npi) in "QST".

The New Jersey Slow Net (NJSN) for years has taught traffic handling at

slow speed, which improved both traffic handling and code skills. The net makes good listening for SWL ham wannabes, as well as Novices. Perhaps there is one on a frequency near you. See if you can get hold of a League NET DIRECTORY, which lists nets in the National Traffic System, et al.

>See the "=OR="?? That implies if you don't renew and don't tell the FCC
>you can operate forever!
>
>(Not what he meant, but he did say it...)

That implies nothing of the sort. It implies that you may continue to operate until you either receive your renewed license or the FCC notifies you that your application for renewal was denied.

Jeez, is it that complicated? Pretty crystal to me. You must be one of the many who are misinterpreting the 2nd Amendment of the Constitution too...
